The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,527,596 in view of Blanche. Claim 1 of '596 substantially recites the claimed invention except for the frame, there being at least two blades in the frame, each blade including an enclosed section and an exposed section, each blade including an end having a wire-receiving groove, a neck being defined between the wire-receiving groove and the exposed section, each neck being twisted so that the grooves face the same direction. Blanche discloses frame 12, blades 14,16 having necks 36,36a which are twisted so that the wire-receiving grooves 34 face the same direction. It would have been obvious to provide another blade of '596 in a frame, each blade having a twisted neck, as taught by Blanche, to allow for use in an electrical plug.
